

Import Guide

1. Open “Window->Package Manager”
2. Search “Shader Graph” in the “Unity Registry”
3. Import “Production Ready Samples”

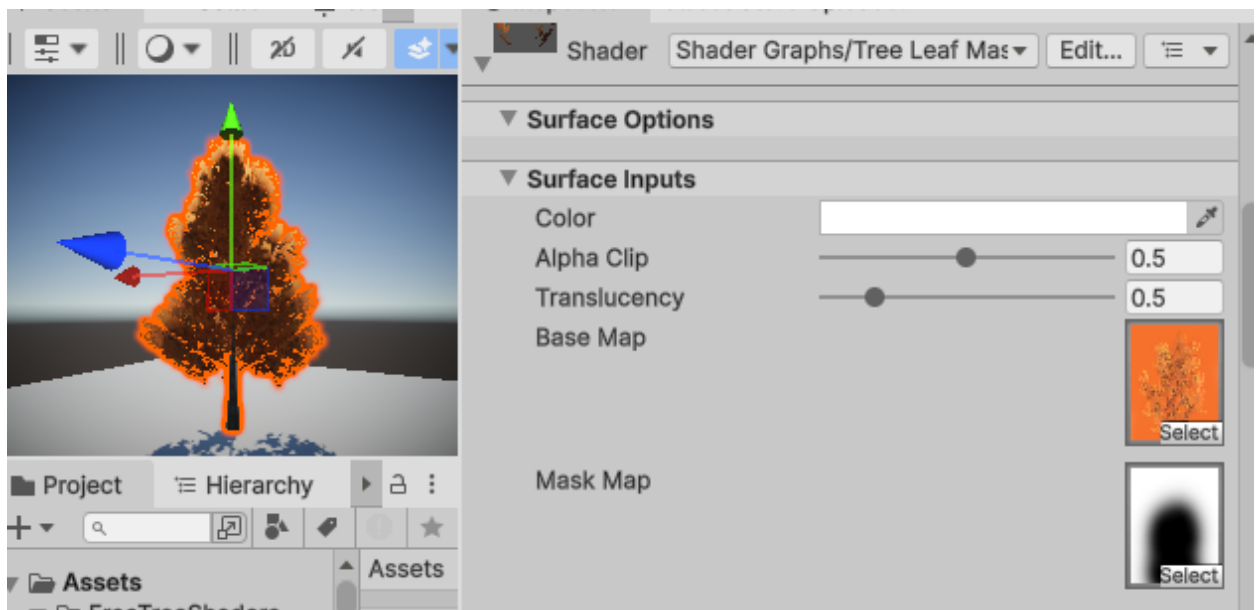

How to Use

Select your Leaf material and assign below shader:

“Shader Graphs->Tree Leaf”

“Shader Graphs->Tree Leaf Mask Map”

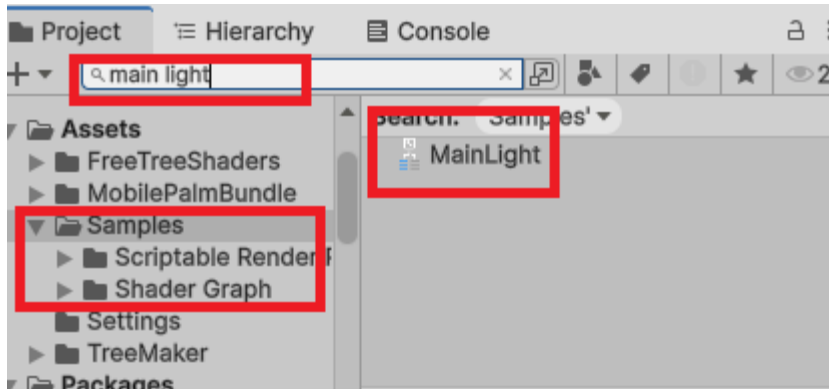

Both are the same, the second shader only support mask map to avoid translucency and color from specific part of the leaf texture

Shader Error

If you have shader error after importing this package and shader graph production ready samples, you can manually fix the shader error:

1. Open Tree Leaf shader
2. Search “Main Light” in the “Assets -> Samples” folder

4. Drag “MainLight” into the “Tree Leaf” shader
5. Connect “Shadow Atten” into the below node:
